## ACHIEVEMENTS

Finalist in the challenges of SpaceApps (2019), OpenSpace (2019), and ActInSpace (2020).

I am currently working as a member of a project to send a NanoSat into orbit as an additional payload for the college main's satellite's project.

## OTHER INTERESTS

- STEM
- Art
- New technologies
- IoT
- Artificial Intelligence
- Science Fiction
- DIY projects
- Travelling
- Learning new languages

## EXPERIENCE

### Developer and collaborator - ALBORES projects

Laboratorio III - LIDI | 2020 - 2021

We use reactIVision + Java technologies to create an interactive game which is the basis for a ubiquitous computing experience.

### Intern

MEGA Ingeniería S.A | 2015

I performed administration and document management tasks.

### Computer and circuit board repairing

On my own

## EDUCATION

### Computer Engineering | 2016 - Present

Universidad Nacional de La Plata

Facultad de Ingeniería y Facultad de Informática

### SAR remote sensing - Introductory level | 2021

CONAE - UEFM

### Optical remote sensing - Introductory level | 2020

CONAE - UEFM

## SKILLS

- Java
- C
- RoR
- CSS
- Bootstrap
- Arduino
- Bash shell
- Parallel and concurrent programming

## LANGUAGES

English B2

German A0
